- Questions and answers.

The Cetuem organic liquid waxing system has for many years been unsurpassed in the beauty industry. It's uniqueness lies in the unusual fundamental format, delivery, immediate and long term benefits that many have been testimony to for over 18 years.

Therapists prosper also from its ability to be more economical as well as effectively allowing treatments to be more efficient. Cetuem have found by applying the same principle to their traditionally known 'hot wax' - now known as 'Brazilian Wax' - therapists are now enjoying similar advantages for more specialised treatments areas.

In support of these remarkable depilatory products, there are just as outstanding sustaining pre and after care products, such as the popular and invaluable Majic Effects - the irreplaceable answer to a very sensitive inflamed skin and Cetuem Stop - the effective hair growth inhibitor.
